

Press Release

Leading Asian operator SingTel offers new Multiplayer Mobile Gaming with Exit Games Neutron multiplayer technology

Hamburg and San Francisco, CA - August 18, 2005 - Mobile multiplayer games are the trend this year and the leading multiplayer technology and service provider, Exit Games, connects gamers all over the world over. Exit Games Neutron multiplayer service allows mobile phone users to play against each other via GPRS and UMTS regardless of the type of mobile phone and network they are using. Exit Games today announced that Singapore Telecommunications Limited (SingTel), Asia's leading telecommunications provider with over 1.55 million subscribers in Singapore and more than 71 million mobile subscribers regionally, will be enlarging its portfolio of multiplayer games with products based on Exit Games Neutron.

After the successful launch of various multiplayer games in Europe and the USA, Exit Games can thus extend the regional coverage and enable gamers to play together on three of the world's continents.

The games offered include a broad selection of titles from various developers, ranging from 3D action games like Robot Alliance and Motoraver (developer: Fishlabs) to the fast, near real-time Brick Challenge (developer: Bytedefenders) to games classics such as chess, darts and black jack (developers: FirstFun TV and Open Knowledge).

The games incorporate comprehensive in-game community features, such as private game invitations, international high scores, buddy lists and chat functions, which complement SingTel's multiplayer games platform, Games Xtreme League, a regional mobile games lobby exclusive to SingTel's group of companies in Asia.

"We are very pleased SingTel has decided to embrace multiplayer mobile games based on our Neutron multiplayer service," says Harald Behnke, CEO of Exit Games.

"Connected games build on the very nature of mobile telecommunications networks: to connect people at any time and in any place. The launch of the games with SingTel means gamers have access to an even larger community of opponents, which makes the games even more varied and interesting."

About Exit Games
